

## Step 1

---

pip install itchat

## Step 2

---

apply an appkey from [www.tuling123.com](http://www.tuling123.com)

## Step 3

---

```
#!/usr/bin/python
# -*- coding: utf-8 -*-

from itchat.content import *
import requests
import json
import itchat

itchat.auto_login(hotReload = True)
def tuling(info):
    appkey = "*****" // replaced with your appkey
    url = "http://www.tuling123.com/openapi/api?key=%s&info=%s"%(appkey,info)
    req = requests.get(url)
    content = req.text
    data = json.loads(content)
    answer = data['text']
    return answer

def group_id(name):
    df = itchat.search_chatrooms(name=name)
    return df[0]['UserName']

@itchat.msg_register([TEXT,MAP,CARD,NOTE,SHARING])
def text_reply(msg):
    itchat.send('%s' % tuling(msg['Text']),msg['FromUserName'])

@itchat.msg_register([PICTURE,RECORDING,ATTACHMENT,VIDEO])
def download_files(msg):
    msg['Text'](msg['FileName'])
```

```
        return '@%s@%s' % ({'Picture': 'img', 'Video': 'vid'}.get(msg['Type'],
'fil'), msg['FileName'])

@itchat.msg_register(TEXT, isGroupChat=True)
def group_text_reply(msg):
    item = group_id(u'*****') //replaced with the group name
    # if msg['ToUserName'] == item:
    if msg['isAt']:
        itchat.send(u'%s' % tuling(msg['Text']), item)

itchat.run()
```
